# SPIDERS

The biggest spider in the world is a "goliath spider".

It measures 30 centimeters from one leg to the other.

It has long poisonous fangs.

A bite from the spider is not dangerous to humans but it hurts.

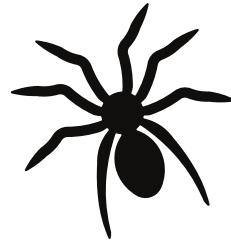

It lives in America.

It doesn't make a spider web but lives in small caves in the ground.

It eats mice, frogs and birds.

The spider doesn't see very well but it has 8 eyes.

# SPIDERS

Find the answers to the questions in the text and write them on the line.

1 What is the name of the biggest spider?

---

---

---

2 Where does the spider live?

---

---

---

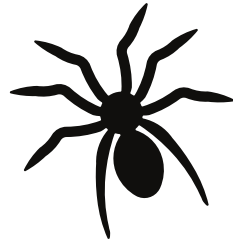

3 What does the spider eat?

---

---

---
